SMART INDIA HACKATHON 2025

- Problem Statement ID: SIH25082
- Problem Statement Title: Development of a travel related software app that can be installed on mobile phones that could capture trip related information
- Theme: Travel & Tourism
- PS Category: Software
- Team ID:
- Team Name: Travelinnee

TRAVELINNEE

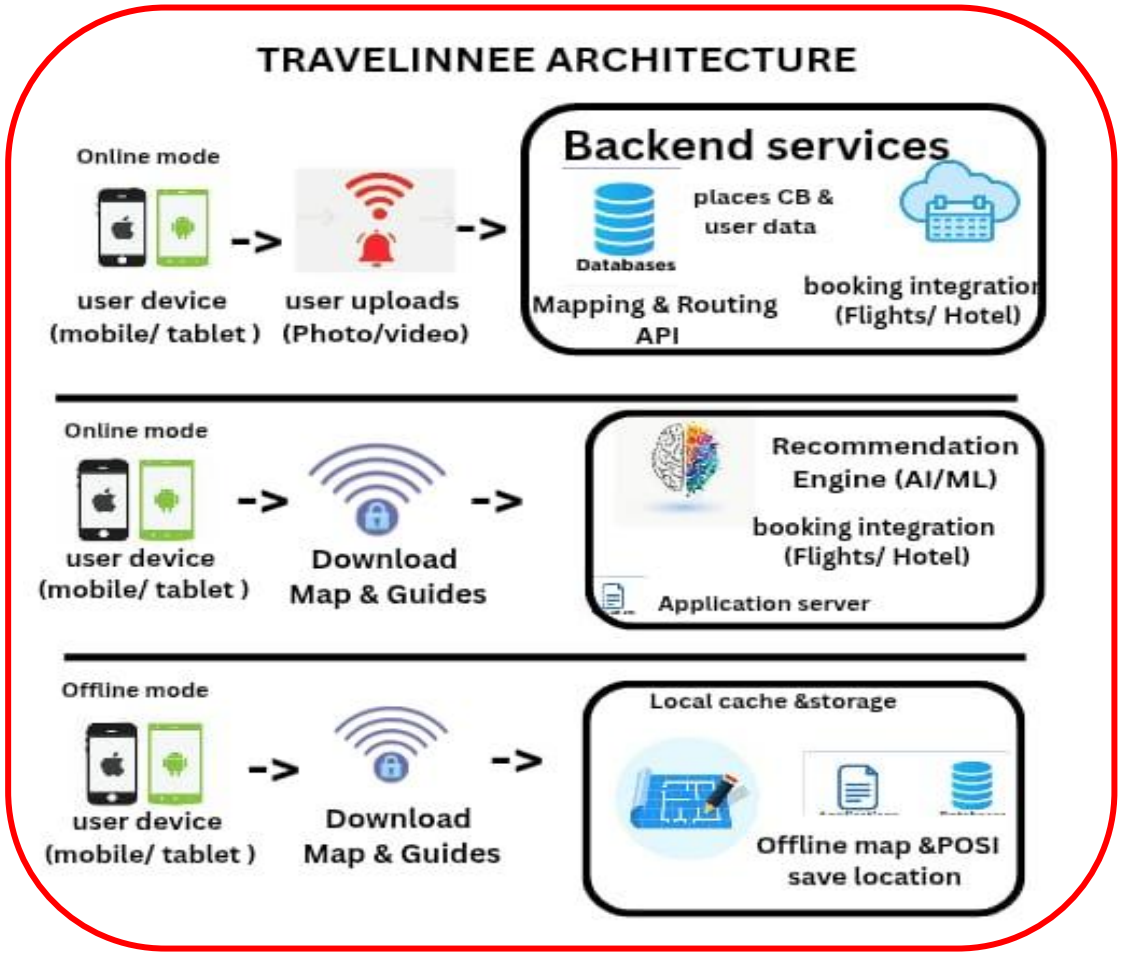
❖ Proposed Solution: Smart Travel App

- AI Travel Guide : Personalized tips, voice assist & translation
- Real-time Navigation : Shortest routes, live traffic updates & tracking
- Instant Cook/Driver : Hire a cook or driver on demand
- Auto Notifications : Local events, sales & travel alerts
- Instant Insights : Famous spots, foods & specialties
- Smart Checklist : Reminders & timely notifications
- Rich Info Hub : Photos, videos, timings & entry fees
- Lottery Locator (Kerala) : Nearby authorized centers
- Food & Accommodation : Discover and book hotels, homestays, and restaurants.
- Booking (Transport & Events) : Reserve rides, flights, and event tickets in one app.
- Shopping : Find malls, local stores, and lottery centers easily.
- Healthcare : Access nearby hospitals and emergency medical help.
- Security (SOS) : Share live location and get instant safety alerts.

All-in-One AI Travel App – Book transport, hotels & events, plan budgets, explore food, get real-time navigation, safety alerts, translations & 24/7 AI guidance.

TECHNICAL APPROACH

- Frontend → Flutter / React Native, modern UI/UX.
- Backend → Node.js / Django APIs, REST/GraphQL services.
- Database → SQL (PostgreSQL/MySQL) + NoSQL (MongoDB/Firebase).
- Integration → Transport, Hotel, Maps, Payments, Translation APIs.
- AI Engine → Recommendations, NLP chatbot, budget optimization.
- Security → End-to-End Encryption, GPS SOS, 2FA login.
- Admin Panel → Web dashboard (React/Angular) with role-based access



TRAVELINNEE

FEASIBILITY

- Technical – Built with reliable tech stack (Flutter, Node.js, AI, APIs).
- Operational – User-friendly app with 24/7 AI support.
- Economic – Low-cost vs. human guides, efficient
- Bookings.Legal – Data privacy & secure payments ensured.

VIABILITY

- Market Demand – Rising need for smart travel apps.
- User Value – One app for booking, food, safety & guidance.
- Revenue – Commission, ads, premium plans.
- Scalability – Expandable across regions & services.

IMPACT AND BENEFITS

- Simplifies travel with a single unified app.
- Improves safety & security through SOS and live tracking.
- Bridges language barriers with instant AI translation.
- Promotes local tourism & culture by highlighting events, food, and shopping.
- AI makes travel safer, smarter, and personalized

- Travelers – Easy bookings,AI suggestion and comparision
- Vendors – Wider reach for hotels, transport, and shops.
- Social – SOS safety, live tracking, AI translation & communication.
- Economic – AI budget planner saves costs, boosts tourism & vendors.
- Trust - Travellers don't depend on a third person, Travelers travel on their own by using this app

RESEARCH AND REFERENCES

1.Tourism and navigation (research and reference):

Kerala Tourism Official Website https://www.keralatourism.org
What it covers: Tourist places, cultural events, festivals, travel tips.

2.Shopping and budget(reference):

MakeMyTrip / Booking.com https://www.makemytrip.com | https://www.booking.com
These apps focus on hotels & transport but lacks in local navigation.

3.Kerala Lottery(research):

http://www.keralalotteries.com
What it covers: Official lottery results, agents, bumper draws, prize info.

4.transport and travel services (reference):

Rome2Rio – https://www.rome2rio.com
shows multi-mode travel routes (bus, flight, train, ferry).

5.survey and articles(research):

https://www.researchgate.net/publication/326954394_Tourism_Information_System_using_GIS
explains: how geographic data are integrated with tourism.

5. AI and personal assistance research):
